

**REMARKS**

Applicant submits the amendments to claims 1 – 14 to eliminate multiple dependencies and editorial errors and to put the claims into customary U.S. format. The amendments submitted herein do not limit the scope of any limitation.

New claims 15 – 32 find support in the specification and figures of the pending application. For example, claims defining the distance between each candy bar in the array are supported by the figures and page 2, line 8 et seq. of the specification. Claims reciting a wrap unit having an asymmetrical u-shape have support in the figures and claims reciting a wrap unit being a tube are supported by page 6, line 28 et seq. of the specification. Claims directed to a wrap unit having a substantially flat lower sheet are supported by the figures and page 5, line 2 et seq. of the specification. Further, a relatively rigid lower sheet is disclosed in the summary and the original claims, and a plastic-coated cardboard is supported by page 5, line 30 et seq. of the specification.

Applicant requests entry of the present amendments and favorable consideration of all the above claims.

Date: April 6, 2007
